

## EMBEDDED LOW LEVEL SOFTWARE DEVELOPER - JUNIOR

### Corporate Description

MANNARINO Systems & Software Inc. holds over 20 years experience in designing, developing, verifying and certifying real-time embedded software for safety critical applications, thanks to a unique combination of services and [COTS products](#).

MANNARINO Systems & Software Inc. customer base is very large, covering traditional aerospace companies as well as new and exciting markets, including electric propulsion, [Urban Air Mobility](#), [Unmanned Aerial Vehicle](#) and autonomous flight.

The MANNARINO culture is focused on high quality, hard work, professionalism and team work within a highly respectful, motivating atmosphere geared towards long-term business growth.

As a member of our team, you will benefit from:

- a comprehensive group insurance and RRSP plan
- a flextime policy with paid overtime
- discretionary bonuses
- a fitness reimbursement program
- other office perks such as catered weekly lunches and free hot beverages (espresso, coffee, hot chocolate and tea)
- regular company outings

MANNARINO is a privately-held Small & Medium Size Enterprise (SME) and was recently awarded the [AIAC's Innovation Technology Award](#)

### Career Opportunity and Primary Roles / Responsibilities

- Work with System Engineers, Embedded Application Software developers and MANNARINO customers to specify and design board support software
- M-RTOS product evolutions (including porting to new processor architectures)
- Integrate software onto partners/customers proprietary boards
- Develop robust, reliable, efficient, and testable low-level software interfacing with sensors, actuators and other peripherals
- Develop software documentation in accordance with the project certification requirements/guidelines
- Support the software verification effort

The position is based in Montreal, CANADA.

**Required Competencies**

- Bachelor's degree in Computer Science, Software, Embedded Systems or similar area with software focus.

**Academic experience in the following areas:**

- Embedded software development in C language
- Real-time operating systems, processor architectures, communication protocols, device drivers, communication buses...
- Knowledge of standard interfaces and interactions between low-level software and hardware blocks (CPU cores, DSPs, special-purpose accelerators, on-chip peripherals, etc.).

**Other Desired Competencies**

- Knowledge of software development in a safety critical context (RTCA DO-178, EN 50128, IEC 62304)
- Experience with scripting languages (Python preferred)
- Experience in continuous integration and continuous testing processes
- Experience with debugger probes
- Experience with software drivers and protocols

**Miscellaneous Requirements**

- Must be able to communicate effectively in French and English
- Occasional travel required to customer sites (usually within North America)
- Possibility of assignment to customer site within the Montreal area
- Must be eligible to work in Canada

At MANNARINO, we believe that passion and a desire to learn is crucial. Diversity of thought and experiences leads to innovative solutions and creativity. This is why we would like to encourage all those interested to apply.
